investigative ophthalmology

A Journal of Clinical and Basic Research

EDITOR

Herbert E. Kaufman, M.D.

Professor of Ophthalmology and Pharmacology
College of Medicine
University of Florida
Gainesville, Florida

MANAGING EDITOR

Maija H. Uotila

University of Florida
Gainesville, Florida

EDITORIAL BOARD

DANIEL M. ALBERT
New Haven, Connecticut

J. STEVENS ANDREWS
Nashville, Tennessee

G. WINSTON BARBER
Philadelphia, Pennsylvania

DWIGHT A. BURKHARDT
Minneapolis, Minnesota

CHANDLER R. DAWSON
San Francisco, California

WILLIAM W. DAWSON
Gainesville, Florida

LYNETTE FEENEY
Portland, Oregon

SIDNEY FUTTERMAN
Seattle, Washington

MORTON GOLDBERG
Chicago, Illinois

PETER GOURAS
Bethesda, Maryland

DAN B. JONES
Houston, Texas

CARL KUPFER
Bethesda, Maryland

ALAN M. LATIES
Philadelphia, Pennsylvania

IRVING H. LEOPOLD
New York, New York

A. EDWARD MAUMENEE
Baltimore, Maryland

WILLIAM H. MILLER
New Haven, Connecticut

STEVEN M. PODOS
St. Louis, Missouri

FRANK M. POLACK
Gainesville, Florida

DAVID A. ROBINSON
Baltimore, Maryland

MELVIN L. RUBIN
Gainesville, Florida

ALAN B. SCOTT
San Francisco, California

MARVIN L. SEARS
New Haven, Connecticut

GERALD WESTHEIMER
Berkeley, California

Subject index*

A

Abrasions, corneal epithelial, healing of, in rabbit, scanning electron microscope study, 648

Acetazolamide, effects of, on human electroretinogram, 935

Acetylcholine-like drugs in mouse eye, evaluation of miotic activity of, drugs affecting cholinergic system in intact mammalian eye, 232

easterase and choline acetyltransferase activities in normal and biologically fractionated mouse retinas, 756

Acetylcholinesterase, localization of, in rabbit cornea by light and electron microscopy, 592

Acid mucopolysaccharides, demonstration of, in trabecular meshwork of Rhesus monkey, 507

Acuity and hyperacuity, visual, 570

Adenosine 3′,5′-monophosphate increases in outflow of aqueous humor from rabbit eye, 40

-monophosphate analogue increases the outflow facility of primate eye, 688

Adhesion, retinal, in light- and dark-adapted rabbits, 353

Adhesive, corneal, use of platelet-fibrinogen-thrombin mixture as, experiments with sutureless lamellar keratoplasty in rabbit, 872

Adrenergic modulation of outflow of aqeous humor, 83

system of rabbit iris, differential effects of inhibitors of monoamine oxidase Types A and B on, 155

Aerobic and anaerobic exercise, standardized, differential effects on intraocular tension, blood pH, and lactate, 782

Alkali burns, prostaglandin-like activity in aqueous humor following, 177

Amaurosis, pressure, blood pressure and, 237

Amacrine cells, nascent electrophysiology of, 171

Amblyopia, meridional, contrast sensitivity in, 78

strabismus, directional impairment of eye movement control in, 692

Amphibian cornea, ascorbic acid stimulated chloride transport in, 763

Anesthesia, CI 744, for ophthalmological examination and surgery in monkeys, 788

halothane, influence of, cone dark adaptation, 212

Announcements, 82, 169, 259, 334, 412, 568, 634, 714, 797, 879, 958

Anophthalmos, apparent, of Syrian hamster, total retinal degeneration of, 321

Anterior chamber of eye, local graft versus host reactions within, formation of corneal endothelial pocks, 640

Antibiotics, effects of, on the in vitro rabbit corneal endothelium, 246

Antibody formation, local, within the eye, study of immunoglobulin class and antibody specificity, 573

Anticholinesterase treatment, subsensitivity to pilocarpine in primate ciliary muscle following topical, 302

Anti-inflammatory agents and intraocular pressure, arachidonic acid-induced elevation of, 772

effectiveness of topically administered corticosteroids in cornea without epithelium, 252

Antiviral drugs and corneal wound healing, 628

Aphakic macular edema, incidence and pathogenesis, 68

flare, measurement of, 306

humor, drainage of, 1

analysis of ascorbate concentration in, by high-pressure liquid chromatography, 947

adrenergic modulation of outflow of, 83

dynamics in man, studies of, effects of pilocarpine upon measurements in young normal volunteers, 848

inflow and outflow, ciliary ganglion stimulation, effects on, 28

in perinatal and adult goats, electrolyte and acid-base status of, 950

outflow of, from rabbit eye, adenosine 3′,5′-monophosphate increases in, 40

production and outflow, neurogenic intraocular pathway for excitatory effects on, ciliary ganglion stimulation, 471

prostaglandin-like activity in, following alkali burns, 177

rates of ion movement from plasma to, in dogfish, *Squalus acanthius*, 662

Ara-A and IDU of human superficial herpetic keratitis, 762

Arachidonic acid-induced elevation of intraocular pressure and anti-inflammatory agents, 772

Arterial Po_2, effect of, on relative retinal blood flow in monkeys, 342

ARVO, Awards program of, 715

Ascorbate concentration, analysis of, in aqueous humor by high-pressure liquid chromatography, 947

Ascorbic acid, concentration of, in posterior and anterior chambers of rhesus monkey *(Macaca mulatta)*, 942

stimulated chloride transport in the amphibian cornea, 763

Aspirin, and indomethacin, systemic, do not prevent response of monkey eye to trauma, 604

*January, pp. 1-82; February, pp. 83-170; March, pp. 171-260; April, pp. 261-336; May, pp. 337-412; June, pp. 413-494; July, pp. 495-568; August, pp. 569-634; September, pp. 635-714; October, pp. 715-798; November, pp. 799-880; December, pp. 881-978.

Asteroid bodies, electron diffraction study of, 399
Astigmatism, corneal, in human populations with varying incidences of strabismus, genetic analysis of indices of corneal power and, 826
Autonomic drugs, ocular hypotensive effects of, 416
Axonal protein transport, slow, and visual function following retinal and optic nerve ischemia, 91
Axons in third nerve nucleus, crossing, 927

B

Barriers to microperoxidase, ocular vascular and epithelial, 556
Basement membrane thickness, retinal capillary, in spiny mice (*Acomys cahirinus*) with induced and spontaneous diabetes, 560
Beta-irradiation, electron microscopic examination of conjunctival squamous cell carcinoma before and during, 791
Biopsy, eye wall, full-thickness, in primates, 565
full-thickness eye wall, an experimental approach to tissue diagnosis and study of choroidal and retinal lesions, 484
Blood-aqueous barrier in ciliary processes of rabbit eye after prostaglandin E_2, morphology of breakdown of, 33
rabbit eye, inhibiting effect of indomethacin on disruption of, 306
flow, retinal, relative, in monkeys, effect of arterial Po_2 on, 342
oxygen saturation, retinal, photographic measurements of, falling saturation rabbit experiments, 606
pH, intraocular pressure, and lactate, differential effects on, standardized aerobic and anaerobic exercise, 782
pressure and pressure amaurosis, 237
Bovine corneas, cultured, changes in antigenic composition of, 295
Bovine—Cont'd
lenses, intact, microscopic protein structure of lens with theory for cataract formation as determined by Raman spectroscopy of, 380
BUdR congenital cataracts, experimental, 145
Breakup time, tear film, effect of tear substitutes on, 255
Bruch's membrane, origin and development of, in monkey fetuses, electron microscopic study, 903

C

Calf eye, characterization of hexokinases in several tissues of, 854
Camera, equator plus, 401
Carcinoma, squamous cell, before and during beta-irradiation, electron microscopic examination of conjunctival, 791
Cat and Rhesus monkey, effect of ocular pressure on choroidal circulation in, 584
optic nerve transection in, effect on retinal vessels, 610
Cataracts, BUdR congenital, experimental, 145
formation in rat lens, mechanism of "hypoglycemic," 746
theory for, as determined by Raman spectroscopy of intact bovine lenses, microscopic protein structure of lens with, 380
Fraser, early cytologic changes of, electron microscopic study, 517
observation of protein diffusivity in intact human and bovine lenses with application to, 449
subcapsular, in aniridic vervet monkeys by echothiophate, induction of, 863
Cathepsin D in retinal pigment epithelium, partial purification and properties of, 617
Cells, amacrine, nascent electrophysiology of, 171
antibody-forming, in eye and draining lymph nodes, effect of local corticosteroids on, 138
Cells—Cont'd
cycle, diabetes, and retina, 4
epithelium, retinal pigmented, in culture, studies on differentiation of, 108
mediated immunity, relevance to ocular diseases, 635
Chambers, posterior and anterior, of rhesus monkey (*Macaca mulatta*), concentration of ascorbic acid in, 942
Chediak-Higashi syndrome, lysosomes and melanin granules of retinal pigment epithelium in mouse model of, 312
Chick embryo retina in culture, effects of monosodium glutamate on, 114
Chicken, effect of intraocular ablation of pecten oculi of, 166
Chloride transport in amphibian cornea, ascorbic acid stimulated, 763
Choline acetyltransferase and acetylcholine esterase activities in normal and biologically fractionated mouse retinas, 756
Cholinergic system, drugs affecting, in intact mammalian eye, evaluation of miotic activity of acetylcholine-like drugs in mouse eye, 232
Chorioretinal diffusion processes following pigment epithelial degeneration, 58
Choroidal and retinal lesions, experimental approach to tissue diagnosis and study of, full-thickness eye wall biopsy, 484
circulation in cat and Rhesus monkey, effect of ocular pressure on, 585
vessels, human, fracture faces of fenestrations and junctions of endothelial cells in, 98
Chromatography, liquid, high-pressure, analysis of ascorbate concentration in aqueous humor by, 947
CI-744 anesthesia for ophthalmological examination and surgery in monkeys, 788

Ciliary arteries, short posterior, and central retinal artery, and the effect on oxygen tension, contribution of, optic nerve circulation and ocular pressure, 475
body and iris epithelial, sulfate and galactose metabolism in differentiating, autoradiographic and ultrastructural studies, 364
ganglion stimulation, effects on aqueous humor inflow and outflow, 28
neurogenic, intraocular pathway for excitatory effects on aqueous humor production and outflow, 471
muscle, primate, subsensitivity to pilocarpine in, following topical anticholinesterase treatment, 302
processes of rabbit eye after prostaglandin E_2, morphology of breakdown of blood-aqueous barrier in, 33
Circadian rhythm of intraocular pressure in New Zealand white rabbit, 775
Circulatory arrest, optic nerve and retina after experimental, 146
Color vision, blue deficiencies in children, 620
Cone and rods, goldfish, experimentally determined optical properties of, 7
dark adaptation, influence of halothane anesthesia, 212
degeneration, inherited, electroretinogram in dogs with, 840
electroretinography, new method of, rapid random flash response, 131
Conjunctiva epithelium, normal surface of, scanning electron microscopic study of, 267
Conjunctival goblet cell density in normal subjects and in dry eye syndromes, 299
Contrast sensitivity in meridional amblyopia, 78
Cornea, amphibian, ascorbic acid stimulated chloride transport in, 763
Cornea—Cont'd
anti-inflammatory effectiveness of topically administered corticosteroids in, without epithelium, 252
bovine, cultured, changes in antigenic composition of, 295
damaging proteases of Serratia maracescens, 190
donor, excision of instead of enucleation, 293
endothelium, effects of antibiotics on in vitro rabbit, 246
familial occurrence of dot (microcystic), fingerprint dystrophy of, 397
isolated rabbit, quantitation of pilocarpine flux enhancement across, by hydrogel polymer lenses, 152
organ-cultured, growth and transplantation of, 24
rabbit, localization of acetylcholinesterase in, by light and electron microscopy, 592
Corneal adhesive, use of platelet-fibrinogen-thrombin mixture as, experiments with sutureless lamellar keratoplasty in rabbit, 872
endothelial pocks, formation of, local graft versus host reactions within anterior chamber of eye, 640
rabbit, effect of vitreous humor on fluid transport by, 497
epithelial abrasions, healing of, in rabbit, scanning electron microscope study, 648
lesions of tyrosine-fed rats, crystals in, 937
regeneration, kinetics of, epidermal growth factor and topical corticosteroids, 630
grafting, histocompatibility in, 883
grafts, fate of experimental, in herpetic keratitis and keratouveitis, 917
power and corneal astigmatism in human populations with varying incidences of strabismus, genetic analysis of indices of, 826
Corneal—Cont'd
stroma, effects of solutes on swelling pressure of, 684
wound healing, antiviral drugs and, 628
Corticosteroids in cornea without epithelium, anti-inflammatory effectiveness of topically administered, 252
local, effect of on antibody forming cells in eye and draining lymph nodes, 138
responsiveness and ocular findings in parents of children with primary infantile glaucoma, 46
topical, kinetics of corneal epithelial regeneration, epidermal growth factor and, 630
topically administered, and treatment of inflammatory keratitis, 337
Crystals in corneal epithelial lesions of tyrosine-fed rats, 937
Cylinder organelle, ultrastructural description of, in outer plexiform layer of human retinas, 923
Cytologic changes of retina and pigment epithelium during hibernation, 457

D

Dark adaptation, cone, influence of halothane anesthesia, 212
Degeneration, inherited cone, electroretinogram in dogs with, 840
pigment epithelial, chorioretinal diffusion processes following, 58
retinal, hereditary, in Wag/Rij rats, a new form of, 62
total, on apparent anophthalmos of Syrian hamster, 321
Diabetes, cell cycle, and retina, 1
retinal capillary basement membrane thickness in spiny mice (*Acomys cahirinus*) with induced and spontaneous, 560
Diacetyl morphine and lysergic acid diethylamide in rabbit, ocular effects of, 325
Dogs, electroretinogram in, with inherited cone degeneration, 840

Dogfish, rates of ion movement from plasma to aqueous humor in, *Squalus acanthius*, 662
Dot (microcystic) map, familial occurrence of, fingerprint dystrophy of cornea, 397
Drugs, antiviral, and corneal wound healing, 628
autonomic, ocular hypotensive effects of, 416
inserts, ophthalmic, 87
Dry eye syndromes, conjunctival, goblet cell density in normal subjects and, 299
Dynamics, aqueous humor, in man, studies of effects of pilocarpine upon measurements in young normal volunteers, 848
Dystrophy, fingerprint, of cornea, familial occurrence of dot (microcystic) map, 397

E

Echothiophate, induction of subcapsular cataract in aniridic vervet monkeys by, 863
Edema, aphakic macular, incidence and pathogenesis, 68
uveal, experimental serous and hemorrhagic, associated with retinal detachment surgery, 243
Editors, contributing, 1974, 10; 1975, 957
Letters to the, 876
Electrolyte and acid-base status of aqueous humor in perinatal and adult goats, 950
Electron and light microscopy, localization of acetylcholinesterase in rabbit cornea by, 592
diffraction study of asteroid bodies, 399
microscope study, scanning, healing of corneal epithelial abrasions in rabbit, 648
normal surface of conjunctiva epithelium, 267
Electrophysiology, nascent, of amacrine cells, 171
Electroretinogram, human, effects of acetazolamide on human, 935
in dogs with inherited cone degeneration, 840
Electroretinography, cone, new method of, rapid random flash response, 131
Emission spectra and excitation of fluorescein dye in human ocular fundus, 487
Endothelial cells in human choroidal vessels, fracture faces of fenestrations and junctions of, 98
connection, 569
pocks, corneal, formation of, local graft versus host reactions within anterior chamber of eye, 640
Endothelium, corneal, rabbit, effects of antibiotics on in vitro, 246
vitreous humor on fluid transport by, 497
Enucleated human eyes, experimental tonography on, validity of Grant's tonography formula, 199
Enucleation, excision of donor cornea instead of, 293
Epidermal growth factor and topical corticosteroids, kinetics of corneal epithelial regeneration, 630
Epithelial abrasions, corneal, healing of, in rabbit, scanning electron microscope study, 648
Epithelium, anti-inflammatory effectiveness of topically administered corticosteroids in cornea without, 252
cells, retinal pigmented, in culture, studies on differentiation of, 108
ciliary body and iris, sulfate and galactose metabolism in differentiating, autoradiographic and ultrastructural studies, 364
conjunctiva, normal surface of, scanning electron microscopic study of, 267
degeneration, pigment, chorioretinal diffusion processes following, 58
lesions of tyrosine-fed rats, crystals in corneal, 937
regeneration, corneal, kinetics of, epidermal growth factor and topical corticosteroids, 630
Epithelium—Cont'd
retina and pigment, during hibernation, cytologic changes of, 457
retinal pigment, in mouse model of Chediak-Higashi syndrome, lysosomes and melanin granules of, 312
retinal pigment, isolated, binding of retinol to, in presence and absence of retinol-binding protein, 785
microperoxisomes in, 866
partial purification and properties of cathepsin D in, 617
Equator plus camera, 401
Excitation and emission spectra of fluorescein dye in human ocular fundus, 487
Excitatory effects on aqueous humor production and outflow, neurogenic, intraocular pathway for, ciliary ganglion stimulation, 471
Exercise, standardized aerobic and anaerobic, differential effects on intraocular tension, blood pH, and lactate, 782
Exotropia surgery, quantitative guidelines for, 428
Extraocular muscle cooperation and squint, quantitative analysis of, 801
of myotonic mouse, muscle fiber and motor end plate involvement in, 418
Eye movements, comparative velocities of different types of fast, 689
wall biopsy, full-thickness, as experimental approach to tissue diagnosis and study of choroidal and retinal lesions, 484
in primates, 565

F

Flash response, rapid random, new method of cone electroretinography, 131
Fluid dynamics, instilled, and surface chemistry of polymers in the preocular tear film, 887
subretinal, lipid analyses, 406
transport, effect of vitreous humor on, by rabbit corneal endothelium, 497

Fluorescein-diffusion in human optic disc, 205
dye in human ocular fundus, excitation and emission spectra of, 487
Fluorometric determination of retinol in serum, new, rapid, 125
Fracture faces of fenestrations and junction of endothelial cells in human choroidal vessels, 98
Fraser cataract, early cytologic changes of, electron microscopic study, 517
Frequency shifts, instantaneous, in light modulated above fusion, retinal and cortical electrophysiological responses to, 75
Fundus, ocular, human, excitation and emission spectra of fluorescein dye in, 487
photography, objective focusing method for, 329
temperature on threshold lesion temperatures in laser-irradiated rabbit retina, effect of pre-exposure, 562
Fusion, light modulated above, retinal and cortical electrophysiological responses to instantaneous frequency shifts in, 75

G

Galactose and sulfate metabolism in differentiating ciliary body and iris epithelia, autoradiographic and ultrastructural studies, 364
Gamma-glutamyl cycle, enzyme of, evidence for lens oxoprolinase, 228
Ganglion stimulation, ciliary, effects on aqueous humor inflow and outflow, 28
neurogenic, intraocular pathway for excitatory effects on aqueous humor production and outflow, 471
Geniculate nucleus, normal monkey lateral, histological observations in, 55
Glaucoma, infantile, ocular findings and corticosteroid responsiveness in parents of children with, 46
long-acting Ocusert-pilocarpine system in management of, 43
Glutamate, monosodium, effects of, on chick embryo retina in culture, 114
Goats, perinatal and adult, electrolyte and acid-base status of aqueous humor in, 950
Goblet cell density, conjunctival, in normal subjects and in dry eye syndromes, 299
Goldfish cones and rods, experimentally determined optical properties of, 7
Gonioscopy, minified Swan-Jacob lens for, in small primates, 410
Grafting, histocompatibility in corneal, 883
Grant's tonography formula, validity of, experimental tonography on enucleated human eyes, 199
Granules, melanin, and lysosomes of retinal pigment epithelium in mouse model of Chediak-Higashi syndrome, 312
Growth factor, epidermal, and corticosteroids, kinetics of corneal epithelial regeneration, 630

H

Halothane anesthesia, cone dark adaptation, influence of, 212
Hamster, Syrian, total retinal degeneration on apparent anophthalmos of, 321
Herpetic keratitis in rabbits, effect of nonspecific immune stimulation on recurrence rate of, 469
Hexokinases, characterization of, in several tissues of calf eye, 854
Hibernation, cytologic changes of retina and pigment epithelium during, 457
Holography, ultrasonic transmission, of the eye, 72
Hydrogel polymer lenses, quantitation of pilocarpine flux enhancement across isolated rabbit cornea by, 152
Hyperacuity and acuity, visual, 570

I

IDU and Ara-A of human superficial herpetic keratitis, 762
Imidazoles of ocular inflammatory and pressure responses, modification by, 280
Immune stimulation, nonspecific, effect of, on recurrence rate of herpetic keratitis in rabbits, 469
Immunity, cell-mediated, relevance to ocular diseases, 635
Immunoglobulin class and antibody specificity, local antibody formation within the eye, study of, 573
Indocyanine green in eye, note on distribution of Iodine-123-labeled, 780
Indomethacin and aspirin, systemic, do not prevent response of monkey eye to trauma, 604
inhibiting effect of, on disruption of blood-aqueous barrier in rabbit eye, 306
Infantile glaucoma, ocular findings and corticosteroid responsiveness in parents of children with, 46
Injury, pathways for response of eye to, 184
Intraocular ablation of pecten oculi of chicken, effect of, 166
fluid, loss of, by tonography, experimental tonography on enucleated human eyes, 944
lenses, calculation of optical power of, 625
pressure and anti-inflammatory agents, arachidonic acid-induced elevation of, 772
circadian rhythm of, in New Zealand white rabbit, 775
control of, preliminary report on supraoptic nucleus and, 26
effect of, on conventional outflow resistance in enucleated human eye, 286
regulation, importance of mucopolysaccharides in, 173
tension, blood pH, and lactate, differential effects on, standardized aerobic and anaerobic exercise, 782

Iodine-123-labeled indocyanine green in eye, note on distribution of, 780
Ion movement, rates of, from plasma to aqueous humor in dogfish, *Squalus adanthius*, 662
Iridectomy, total, in primate in vivo, surgical techniques and postoperative anatomy, 766
Iris and ciliary body epithelia, sulfate and galactose metabolism in differentiating, autoradiographic and ultrastructural studies, 364
  rabbit, differential effects of inhibitors of monoamine oxidase Types A and B on adrenergic system of, 155
Ischemia, optic nerve, slow axonal protein transport and visual function following retinal and, 91

J

Juncture, retinochoroidal, specializations of the, 701

K

Keratitis, herpetic, and keratouveitis, fate of experimental corneal grafts in, 917
  in rabbits, effect of nonspecific immune stimulation on recurrence rate of, 469
  inflammatory, topically administered corticosteroids and treatment of, 337
  superficial herpetic, human, Ara-A and IDU therapy of, 762
Keratoplasty, lamellar, sutureless, in rabbit, experiments with, use of platelet-fibrinogen-thrombin mixture as corneal adhesive, 872
Keratouveitis and herpetic keratitis, fate of experimental corneal grafts in, 917

L

Lactate, blood pH, and intraocular pressure, differential effects on, standardized aerobic and anaerobic exercise, 782
Lamellar keratoplasty, sutureless, in rabbit, experiments with, use of platelet-fibrinogen-thrombin mixture as corneal adhesive, 872
Laser-irradiated rabbit retina, effect of pre-exposure fundus temperature on threshold lesion temperatures in the, 562
Lateral geniculate nucleus, histology of monkey, after unilateral lid closure and experimental strabismus, further observations, 674
Lead, radioactive, in ocular and skin melanoma, localization of, 492
Length vs. luminence, report on reports, 495
Lens, effects of lysophosphatidyl choline and phospholipase A on, 697
  hydrogel polymer, quantitation of pilocarpine flux enhancement across isolated rabbit cornea by, 152
  intact human and bovine, with application to cataract, observation of protein diffusivity in, 449
  intraocular, calculation of optical power of, 625
  microscopic protein structure of, with theory for cataract formation as determined by Raman spectroscopy of intact bovine lenses, 380
  oxoprolinase, evidence for, an enzyme of the gamma-glutamyl cycle, 228
  rat, mechanism of "hypoglycemic" cataract formation in, 746
Lesions, corneal epithelial, of tyrosine-fed rats, crystals in, 937
Lid closure, unilateral, and experimental strabismus, histology of monkey lateral geniculate nucleus after, further observations, 674
Light and electron microscopy, localization of acetylcholinesterase in rabbit cornea by, 592
  exposure, near-UV, response of mouse ocular tissues to continuous, 710
Light—Cont'd
  modulated above fusion, retinal and cortical electrophysiological responses to instantaneous frequency shifts in, 75
Lipid analyses, subretinal fluids, 406
Liquid chromatography, high-pressure, analysis of ascorbate concentration in aqueous humor by, 947
Lymph nodes, draining, effect of local corticosteroids on antibody-forming cells in eye and, 138
Lymphocyte-induced vitreous membranes, a comparative study with leukocyte- and platelet induced vitreous membranes, 240
Lysergic acid diethylamide and diacetyl morphine, in rabbit, ocular effects of, 325
Lysophosphatidyl choline and phospholipase A on lens, effects of, 697
Lysosomes and melanin granules of retinal pigment epithelium in mouse model of Chediak-Higashi syndrome, 312
Lysozyme in human tears, spectrophotometric method for quantitative determination of, 479
  values, aqueous and serum, in experimental uveitis in rabbits, 953

M

Macular edema, aphakic, incidence and pathogenesis, 68
Mammalian eye, intact, drugs affecting cholinergic system in, evaluation of miotic activity of acetylcholine-like drugs in mouse eye, 232
Marihuana and the eye, 261
Marijuana smoking and reduced pressure in human eyes, drug action or epiphenomenon?, 52
Melanin granules and lysosomes of retinal pigment epithelium in mouse model of Chediak-Higashi syndrome, 312
Melanoma, ocular and skin, localization of radioactive lead in, 492

Membranes, vitreous, physical properties of experimental, tensile strength, 148
Memoriam, in (Ludwig J. K. von Sallmann, 1892-1975), 881
Meridional amblyopia, contrast sensitivity in, 78
Metabolism, sulfomucopolysaccharide, in eye, effects of vibration on, 250
Mice, spiny *(Acomys cahirinus)* with induced and spontaneous diabetes, retinal capillary basement membrane thickness in, 560
Microperoxidase, ocular vascular and epithelial barriers to, 556
Microperoxisomes in retinal pigment epithelium, 866
Microscopy, electron and light, localization of acetylcholinesterase in rabbit cornea by, 592
Miotic activity of acetylcholine-like drugs in mouse eye, evaluation of, drugs affecting cholinergic system in intact mammalian eye, 232
drugs in intact mouse, rapid method for measuring, 159
Models, plea for, 799
Monkeys, CI-744 anesthesia for ophthalmological examination and surgery in, 788
effect of arterial Po_2 on relative retinal blood flow in, 342
Monkey eye, systemic aspirin and indomethacin do not prevent response of to trauma, 604
fetuses, origin and development of Bruch's membrane in, electron microscopic study, 903
lateral geniculate nucleus after unilateral lid closure and experimental strabismus, histology of, further observations, 674
normal, histological observations in lateral geniculate nucleus of, 55
Rhesus, and cat, effect of ocular pressure on choroidal circulation in, 584
Monkey, Rhesus—Cont'd
demonstration of acid mucopolysaccharides in trabecular meshwork of, 507
(Macaca mulatta), concentration of ascorbic acid in posterior and anterior, 942
vervet aniridic, induction of subcapsular cataracts in, by echothiophate, 863
Monoamine oxidase Types A and B on adrenergic system of rabbit iris, differential effects of inhibitors of, 155
Monosodium glutamate, effects of, on chick embryo retina in culture, 114
Motor end plate and muscle fiber involvement in extraocular muscles of myotonic mouse, 418
Motor end plate and muscle fiber involvement in extraocular muscles of myotonic mouse, 418
Mouse eye, drugs affecting cholinergic system in intact mammalian eye, evaluation of miotic activity of acetylcholine-like drugs in, 232
model of Chediak-Higashi syndrome, lysosomes and melanin granules of retinal pigment epithelium in, 312
myotonic, muscle fiber and motor end plate involvement in extraocular muscles of, 418
ocular, tissue, response of, to continuous near-UV light exposure, 710
rapid method for measuring miotic activity of drugs in intact, 159
retinas, choline acetyltransferase and acetylcholine esterase activities in normal and biologically fractionated, 756
Mucolipidosis IV, ocular, systemic, and ultrastructural finding, 437
Mucopolysaccharides, importance of, in intraocular pressure regulation, 173
Muscle, ciliary, primate, subsensitivity to pilocarpine in, following topical anticholinesterase treatment, 302
Muscle—Cont'd
cooperation, extraocular, and squint, quantitative analysis of, 801
fiber and motor end plate involvement in extraocular muscles of myotonic mouse, 418

N

Near-UV light exposure, response of mouse ocular tissues to continuous, 710
Nerve nucleus, third, crossing axons in, 927
Neurogenic intraocular pathway for excitatory effects on aqueous humor production and outflow, ciliary ganglion stimulation, 471
Nucleotide, cyclic, metabolism, in retina, 263
Nucleus, lateral geniculate, histology of monkey, after unilateral lid closure and experimental strabismus, further observations, 674
supraoptic and control of intraocular pressure, preliminary report on, 26

O

Occipital rhythms, ongoing, and the VER, stimulation at peaks of the alpha-rhythm, 537
Ocular and skin melanoma, localization and radioactive lead in, 492
diseases, cell-mediated immunity, relevance to, 635
effects of diacetyl morphine and lysergic acid diethylamide in rabbit, 325
findings and corticosteroid responsiveness in parents of children with primary infantile glaucoma, 46
fundus, human, excitation and emission spectra of fluorescein dye in, 487
hypotensive effects of autonomic drugs, 416
pressure and optic nerve circulation, contributions of central retinal artery and short posterior ciliary arteries and the effect on oxygen tension, 475

Ocular, pressure—Cont'd
effect of, on choroidal circulation in cat and Rhesus monkey, 584
optic nerve circulation and, 724
response, pattern of, to topical and systemic prostaglandin, 36
tilt reaction, brainstem oculomotor routine, 833
tissue, mouse, response of, to continuous near-UV light exposure, 710
tumors, photon irradiation of stimulated, 547
vascular and epithelial barriers to microperoxidase, 556
vascularization, intact omentum for, 163
Oculi, pecten, of chicken, effect of intraocular ablation of, 166
Oculomotor routine, brainstem, ocular tilt reaction, 833
system repairs itself, how the, 413
Ocusert-pilocarpine system, long-acting, in management of glaucoma, 43
Omentum, intact, for ocular vascularization, 163
Ophthalmic drug inserts, 87
Optic disc, human, fluorescein diffusion in, 205
nerve and retina after experimental circulatory arrest, 146
circulation and ocular pressure, 724
contribution of central retinal artery and short posterior ciliary arteries and the effect on oxygen tension, 475
fiber projections in normally pigmented squinters, electrophysiologic evidence for normal, 931
ischemia, slow axonal protein transport and visual function following retinal and, 91
of rat, development of, 732
transection in cats, effect on retinal vessels, 610
Optical properties of goldfish cones and rods, experimentally determined, 7
Outflow facility, water drinking and, 49
resistance, conventional, in enucleated human eye, effect of intraocular pressure on, 286
Oxalate retinopathy, experimental model of flecked retina, 359
Oxoprolinase, lens, evidence for, an enzyme of the gamma-glutamyl cycle, 228
Oxygen tension, optic nerve circulation and ocular pressure, contribution of central retinal artery and short posterior ciliary arteries and the effect on, 475

P

Pathways for response of eye to injury, 184
Pecten oculi of chicken, effect of intraocular ablation of, 166
Peripheral vision, optical and neural resolution in, 528
Phospholipase A and lysophosphatidyl choline on lens, effects of, 697
Photography, fundus, objective focusing method for, 329
Photon irradiation of stimulated ocular tumors, 547
Pigment and retina epithelium, cytologic changes of, during hibernation, 457
epithelial degeneration, chorioretinal diffusion processes following, 58
Pilocarpine, effects of, upon measurements in young normal volunteers, studies of aqueous humor dynamics in man, 848
flux enhancement across isolated rabbit cornea by hydrogel polymer lenses, quantitation of, 152
subsensitivity to, in primate ciliary muscle following topical anticholinesterase treatment, 302
Plasma, rates of ion movement from, to aqueous humor in dogfish, *Squalus acanthius*, 662
Platelet-fibrinogen, thrombin mixture as corneal adhesive, use of, experiments with sutureless lamellar keratoplasty in rabbit, 872
Plexiform layer, outer, of human retinas, ultrastructural description of cylinder organelle in, 923
Polymers in preocular tear film, instilled fluid dynamics and surface chemistry of, 887
Posterior and anterior chambers of rhesus monkey (*Macaca mulatta*), ascorbic acid, concentration of, in, 942
Primate ciliary muscle, subsensitivity to pilocarpine in, following topical anticholinesterase treatment, 302
eye, adenosine 3′,5′-monophosphate analogue increases outflow facility of, 688
full-thickness eye wall biopsy in, 565
small, minified Swan-Jacob lens for gonioscopy in, 410
total iridectomy in vivo, surgical techniques and postoperative anatomy, 766
Prostaglandin E_2, morphology of breakdown of blood-aqueous barrier in ciliary processes of rabbit eye after, 33
like activity in aqueous humor following alkali burns, 177
pattern of ocular response to topical and systemic, 36
Proteases, cornea-damaging, or *Serratia maracescens*, 190
Protein diffusivity, observation of, in intact human and bovine lenses with application to cataract, 449
fraction from rabbit vitreous, vitreous structure, chemical composition of insoluble residual, 613
retinol-binding, binding of retinol to isolated retinal pigment epithelium in the presence and absence of, 785
structure of lens, microscopic, with theory for cataract formation as determined by Raman spectroscopy of intact bovine lenses, 380

R

Rabbits, aqueous and serum lysozyme values in experimental uveitis in, 953

Rabbits—Cont'd
cornea, localization of acetylcholinesterase in, by light and electron microscopy, 592
corneal endothelium, effects of antibiotics on in vitro, 246
vitreous humor on fluid transport by, 497
effect of nonspecific stimulation on recurrence rate of herpetic keratitis in, 469
experiments with sutureless lamellar keratoplasty in, use of platelet-fibrinogen-thrombin mixture as corneal adhesive, 872
eye, adenosine 3′,5′-monophosphate increases in outflow of aqueous humor from, 40
ciliary processes of, after prostaglandin E_2, morphology of breakdown of blood-aqueous barrier in, 33
inhibiting effect of indomethacin on disruption of blood-aqueous barrier in, 306
healing of corneal epithelial abrasions, scanning electron microscope study, 648
iris, differential effects of inhibitors of monoamine oxidase Types A and B on adrenergic system of, 155
isolated cornea of, quantitation of pilocarpine flux enhancement across isolated, by hydrogel polymer lenses, 152
light- and dark-adapted, retinal adhesion in, 353
New Zealand white, circadian rhythm of intraocular pressure in, 775
ocular effects of diacetyl morphine and lysergic acid diethylamide in, 325
retina, effect of pre-exposure fundus temperature on threshold lesion temperatures in the laser-irradiated, 562
vitreous, chemical composition of insoluble residual protein fraction from, vitreous structure, 613
Raman spectroscopy of intact bovine lenses, microscopic protein structure of lens with theory for cataract formation as determined by, 380
Rats, crystals in corneal epithelial lesions of tyrosine-fed, 937
development of optic nerve of, 732
lens, cataract formation in, mechanism of "hypoglycemic," 746
Wag/Rij, a new form of hereditary retinal degeneration in, 62
Reactions, local graft versus host, within the anterior chamber of eye, formation of corneal endothelial pocks, 640
Regeneration, kinetics of corneal epithelial, epidermal growth factor and topical corticosteroids, 630
Responses, electrophysiological, retinal and cortical, to instantaneous frequency shifts in light modulated above fusion, 74
ocular inflammatory and pressure, modification by imidazoles, 280
rapid random flash, new method of cone electroretinography, 131
Retina and optic nerve after experimental circulatory arrest, 146
pigment epithelium, cytologic changes of, during hibernation, 457
chick embryo, in culture, effects of monosodium glutamate on, 114
cyclic nucleotide metabolism in, 263
diabetes, cell cycle and, 1
flecked, experimental model of, oxalate retinopathy, 359
rabbit, effect of pre-exposure fundus temperature on threshold lesion temperatures in the laser-irradiated, 562
Retinal adhesion in light- and dark-adapted rabbits, 353
Retinal—Cont'd
and choroidal lesions, experimental approach to tissue diagnosis and study of, full-thickness eye wall biopsy, 484
cortical electrophysiological responses to instantaneous frequency shifts in light modulated above fusion, 75
artery, central, and short posterior ciliary arteries and the effect on oxygen tension, contributions of, optic nerve circulation and ocular pressure, 475
blood flow, relative, in monkeys, effect of arterial Po_2, 342
oxygen saturation, photographic measurements of, falling saturation rabbit experiments, 606
capillary basement membrane thickness in spiny mice *(Acomys cahirinus)* with induced and spontaneous diabetes, 560
degeneration, hereditary, in Wag/Rij rats, a new form of, 62
total, on apparent anophthalmos of Syrian hamster, 321
detachment surgery, experimental and serous and hemorrhagic uveal edema associated with, 243
pigment epithelium, binding of retinol to isolated, in presence and absence of retinol-binding protein, 785
cells in culture, studies on differentiation of, 108
lysosomes and melanin granules of, in mouse model of Chediak-Higashi syndrome, 312
microperoxisomes in, 866
partial purification and properties of cathepsin D in, 617
vessels, effect on, optic nerve transection in cats, 610
Retinas, human, ultrastructural description of cylinder organelle in outer plexiform layer of, 923

Retinas—Cont'd
mouse, choline acetyltransferase and acetylcholine esterase activities in normal and biologically fractionated, 756
Retinitis pigmentosa, serum levels of retinol-binding protein in different genetic types of, 236
Retinochoroidal juncture, specializations of the, 701
Retinol, binding of, to isolated retinal pigment epithelium in presence and absence of retinol-binding protein, 785
protein, serum levels of, in different genetic types of retinitis pigmentosa, 236
new, rapid fluorometric determination of in serum, 125
Retinopathy, oxalate, experimental model of flecked retina, 359
Rhesus monkey and cat, effect of ocular pressure on choroidal circulation in, 584
demonstration of acid mucopolysaccharides in trabecular meshwork of, 507
Rhythms, occipital, ongoing, and the VER, stimulation at peaks of the alpha-rhythm, 537
Rods and cones, goldfish, experimentally determined optical properties of, 7

S

Saccades, closely spaced, 317
human, most naturally occurring have magnitudes of 15 degrees or less, 468
Saturation, photographic measurements of retinal blood oxygen, falling saturation rabbit experiments, 606
Scleral-chorioretinal tissue, biopsy of human, 707
Serratia maracescens, cornea-damaging proteases of, 190
Serum levels of retinol-binding protein in different genetic types of retinitis pigmentosa, 236
new, rapid fluorometric determination of retinol in, 125
Skin and ocular melanoma, localization and radioactive lead in, 492
Solutes, effects of, on swelling pressure of corneal stroma, 684
Spectroscopy, Raman, of intact bovine lenses, microscopic protein structure of lens with theory for cataract formation as determined by, 380
Squalus acanthius, dogfish, rates of ion movement from plasma to aqueous humor in, 662
Squamous cell carcinoma before and during beta-irradiation, electron microscopic examination of conjunctival, 791
Squint, quantitative analysis of extraocular muscle cooperation and, 801
Squinters, electrophysiologic evidence for normal optic nerve fiber projections in normally pigmented, 931
Stimulation, ciliary ganglion, effects on aqueous humor inflow and outflow, 28
Strabismus amblyopia, directional impairment of eye movement control in, 692
experimental, histology of monkey lateral geniculate nucleus after unilateral lid closure, further observations, 674
genetic analysis of indices of corneal power and corneal astigmatism in human populations with varying incidences of, 826
Stroma, corneal, effects of solutes on swelling pressure of, 684
Subcapsular cataracts in aniridic vervet monkeys by echothiophate, induction of, 863
Subretinal fluids, lipid analyses, 406
Sulfate and galactose metabolism in differentiating ciliary body and iris epithelia, autoradiographic and ultrastructural studies, 364
Sulfomucopolysaccharide metabolism in eye, effects of vibration on, 250
Supraoptic nucleus and control of intraocular pressure, preliminary report on, 26
Swan-Jacob lens, minified, for gonioscopy in small primates, 410
Syndrome, Chediak-Higashi, lysosomes and melanin granules of retinal pigment epithelium in mouse model of, 312
dry eye, conjunctival, goblet cell density in normal subjects and, 299
Syrian hamster, total retinal degeneration on apparent anophthalmos of, 321

T

Tear film, preocular, polymers in, instilled fluid dynamics and surface chemistry of, 887
human, spectrophotometric method for quantitative determination of lysozyme in, 479
substitutes, effect of, on tear film breakup time, 255
Tissue diagnosis and study of choroidal and retinal lesions, experimental approach to, full-thickness eye wall biopsy, 484
scleral-chorioretinal, biopsy of human, 707
Tonography, experimental, on enucleated human eyes, loss of intraocular fluid caused by tonography, 944
validity of Grant's tonography formula, 199
Trabecular meshwork of Rhesus monkey, demonstration of acid mucopolysaccharides in, 507
Trauma, systemic aspirin and indomethacin do not prevent the response monkey eye to, 604
Tumors, ocular, photon irradiation of stimulated, 547
Tyrosine-fed rats, crystals in corneal epithelial lesions of, 937

U

Ultrasonic transmission holography of the eye, 72

Uveal edema, experimental serous and hemorrhagic, associated with retinal detachment surgery, 243
Uveitis, experimental, in rabbits, aqueous and serum lysozyme values in, 953

V

Vascularization, ocular, intact omentum for, 163
VER, ongoing occipital rhythms and the, stimulation at peaks of the alpha-rhythm, 537
Vervet monkeys, aniridic, induction of subcapsular cataracts in, by echothiophate, 863
Vessels, choroidal, human, fracture faces of fenestrations and junctions of endothelial cells in, 98
Vessels—Cont'd
retinal, optic nerve transection in cats, effect on, 610
Vibration, effects of, on sulfomucopolysaccharide metabolism in eye, 250
Vision, color, blue deficiencies in children, 620
peripheral, optical and neural resolution in, 528
research, conflicts of interest and, 340
Visual acuity and hyperacuity, 570
function and slow axonal protein transport following retinal and optic nerve ischemia, 91
space, remapping of, 719
Vitreous humor, effect of, on fluid transport by rabbit corneal endothelium, 497
Vitreous—Cont'd
membranes, lymphocyte-induced, a comparative study with leukocyte- and platelet-induced vitreous membranes, 240
physical properties of experimental, tensile strength, 148
structure, chemical composition of insoluble residual protein fraction from rabbit vitreous, 613

W

Wag/Rij rats, a new form of hereditary retinal degeneration in, 62
Water drinking and outflow facility, 49
Wound healing, corneal, antiviral drugs and, 628
